EXPERTISE

- Project Management
- API Design
- CI/CD
- Scrum Methodology
- A/B Testing
- Web Security
- Web Applications
- Mobile App Development
- Design
- Performance Optimization
- Scalability Optimization
- Search Engine Optimization
- Risk Assessment
- Data Extraction
- Deployment

TECH

- Nodejs
- Javascript
- React/React Native
- Python
- Golang
- HTML/CSS
- Git/Github/Gitlab
- MongoDB
- MySQL
- Nextjs
- Kubernetes
- Salesforce
- AWS
- Docker
- Jira/Monday

WORK EXPERIENCE

Senior Software Engineer

Branding Brand

May 2022 - Present

- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability and performance.
- Installed and configured software applications and tested solutions for functionality.
- Reviewed project specifications and designed technology solutions that met or exceeded performance expectations.
- Coordinated with other engineers to evaluate and improve software and hardware interfaces.
- Wrote highly maintainable, solid code for software system, forming core framework and earning consistent praise from subsequent developers since initial version.
- Gathered and defined customer requirements to develop clear specifications for project plans.

Software Engineer/Network Automation Engineer

unWired Broadband

March 2021 - May 2022

- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- Developed software for both desktop and mobile operating systems.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Introduced agile methodologies and development best practices to division to enhance product development.
- Planned and developed interfaces that simplified overall management and offered ease of use.
- Provided network support services for devices such as hubs, bridges, routers and other hardware.
- Troubleshoot complex multi-vendor network service provider issues.
- Managed, tracked and coordinated problem resolution and escalation processes.

Freelance Developer

DevelopedByDannon

December 2018 - Present

- Designed, developed and implemented software applications for website based on analyzed requirements and understanding of industry technical standards.
- Adjusted design parameters to boost performance and incorporate new features.
- Developed programs from ground up using measured, market-focused approach to eliminate waste and streamline implementation cycle.
